PROFESSIONAL SUMMARY

B.Tech Computer Science graduate with expertise in AI/ML, data science, and full-stack development. Skilled in Python, Django, Flask, and Streamlit, with hands-on experience in building scalable and production-ready applications. Passionate about solving real-world problems through innovative technology solutions and continuously learning modern development technologies.

TECHNICAL SKILLS

Languages	Python, C, C++, JavaScript
Databases	MySQL, MongoDB, PostgreSQL
Frameworks & Tools	Flask, Streamlit, React JS, Node.js, Express.js, Power BI, Git
AI / ML	Machine Learning, NLP, Computer Vision, CNN, LSTM, CRNN
Core Competencies	REST API Design, Time Series Forecasting, Model Deployment

WORK EXPERIENCE

Python Developer | Nevish Infotech, Surat Dec 2025 – Apr 2026

- Built an AI-powered Flask web app to extract and verify medicine names from handwritten prescription images using the Groq API and a custom OCR pipeline.
- Trained a custom **CRNN model achieving 92% validation accuracy**; integrated a 4-algorithm fuzzy-matching engine against a **491-medicine database**, reducing manual verification effort by ~80%.

AI/ML Intern | Agevole Innovation May 2025 – Jun 2025

- Engineered an **NLP-powered resume screening system** that automated candidate ranking by job-description relevance, cutting recruiter review time by 60%.
- Built a **Streamlit** interface for real-time resume parsing and multi-criteria candidate scoring, validated on 500+ resume samples.

Data Science Intern | Zidio Development May 2025 – Jul 2025

- Conducted end-to-end **time series forecasting** for stock market trends using ARIMA, LSTM, and Prophet; improved 30-day prediction MAPE by 18%.
- Developed a **Healthcare Recommendation System** using NLP and deep learning to deliver personalised medical suggestions across 12 disease categories.

PROJECTS

MedX Diagnosis *Deep Learning, ML, MERN Stack* github.com/Dhruvipipalva1411

Full-stack disease prediction platform integrating 5+ ML/DL models (SVM, Random Forest, CNN) for real-time diagnosis of diabetes, heart disease, and cancer. Built **RESTful APIs** with Node.js/Express and a React frontend achieving **sub-500 ms inference latency**; designed with role-based access and interactive result dashboards.

Deepfake Video Detection *CNN, LSTM, Django* github.com/Dhruvipipalva1411

Hybrid **CNN + LSTM** architecture capturing spatial and temporal video features, reaching **82.5% detection accuracy** on a benchmark deepfake dataset. Deployed via Django with real-time video upload and frame-level analysis supporting MP4 and AVI formats.

EDUCATION

B.Tech, Computer Science & Engineering CHARUSAT University, Gujarat GPA: 8.91 / 10.0

2022 – 2026

Class XII, Gujarat State Board Grade B1 2022

Class X, Gujarat State Board Grade A2 2021

ACHIEVEMENTS & CERTIFICATIONS

- Generative and Agentic AI** — Coursera Dec 2025
- Supervised Machine Learning: Regression & Classification** — Coursera Sep 2024
- AWS Academy Cloud Developing** — Credly Badge Feb 2025
- Database Management System** — NPTEL Jan – Mar 2024
- 2 Concurrent Industry Internships** (AI/ML & Data Science) in 2025 — exceptional time management and cross-domain technical depth.
